

## **Holyrood 350 Event, 4<sup>th</sup> June.**

Dear Climate Concerned Friends

I am emailing you to invite you and members of your Group to join representatives from Transition Towns, Going Carbon Neutral, and other climate change active communities to meet with our MSPs (a good response so far) for an up-beat lunchtime meeting 1-2pm on June 4<sup>th</sup>.

Following the lunchtime meeting with MSPs there will be workshops and strategy discussions (2-4pm) to work out how we can encourage the Scottish Government to take further radical action to enable all communities in Scotland to become resilient zero-carbon communities.

It is really important that we have an excellent turn out from people who are actively working to reduce their communities carbon footprint – especially in the lead up to the final debate of the Scottish Climate Change Bill .

Our MSPs must be made aware that we are behind them in pushing for a strong Climate Change Bill and in their endeavours to strengthen the local communities who are willing to start tackling climate change now.

It would be great if you could join us. Please email me and copy in [justinkenrick@yahoo.co.uk](mailto:justinkenrick@yahoo.co.uk) if you can, and if you can't please suggest someone else (or several others!) who might be able to join us.

The second thing you can do to help, would be to send a version of the email below to your constituency and list MSPs inviting them to join us between 1 and 2pm on June 4th that would be great ([find their contact details here](#) ).

If you can kick off your email with a couple of lines about what your group is doing – a positive story from their constituents – that would be great.

Best wishes and many thanks

**John Riley**
